

The SA-50G is a semi-automated perfect binding machine developed for a production speed of up to 300 units per hour and aimed at the medium to bigger production environments.

Features:

With ease of operation in mind, all controls are situated on a central console with LCD display. After the insertion of loose pages and cover, the binding process is initiated by a single button with no additional operator input required. The clamping and cover scoring pressures are adjustable to ensure a perfect spine every time.

High wearing components such as the solar and slotting cutter are manufactured using only the finest quality steels.

Technical Parameters:

1. Max binding length: 420mm
2. Max binding thickness: 40mm
3. Binding speed: up to 300 books/hour
4. Milling cutter: solar cutter + small cutter
5. Glue melting time: <25min
6. Weight: 170kg
7. Dimensions: 1350x500x900mm
